HIMANSHU JOSHI

CONSULTANT

PERSONAL PROFILE

Certified Cloud Professional with 5+ years of work experience in cloud and Middleware technology. Detail-oriented enthusiast who is always willing to solve new problems.

Consultant

Deloitte | May 2021 - present

Currently working as a DevOps engineer in GPS Insurance project CalHEERS.

I am part of Tech Refresh team who is responsible for migrating current application from tradition infrastructure to microservice infrastructure.

As part of this team I am conducting multiple POC to migrate OHS to Apache and tomcat base environment. Integrating current WebLogic environment with Apache. Working on automation to install and configure apache by writing shell scripts and Ansible playbook.

Setting up of new OpenShift infrastructure for migrating microservices application component and integrating it with current WebLogic environment.

Analyst

Deloitte | March 2019 – May 2021

Managing AWS infrastructure, provisioning new environment based on ad hoc request using CI/CD pipeline, optimizing AWS infrastructure and cost by following AWS best practice.

Automating scheduled and administration tasks using lambda functions and cron jobs.

Managing WebLogic Middleware stack which involves troubleshooting on Dev, Test, Stage environment on daily basis by analyzing the logs from servers and Splunk.

Patching on Dev, Test, Stage, LT, Prod & DR environment using Jira and Ansible. Supporting release activity on both non prod and prod environments by executing pre and post release activity and making system ready for release.

Technical Engineer

Hitachi Systems Micro Clinic | Jul 2016 - Feb 2019

Worked as cloud consultant and helped more then 12+ customers ranging from startup to enterprise, to start their cloud journey by either migrating or initiating their workload on AWS.

Understanding customer requirement and proposing the solution as per business need.

Managing, Provisioning and configuring the services as per the business needs within AWS infrastructure (ELB, SNS, EC2, Route53, S3, RDS, CloudWatch, IAM, SNS, VPC, SES ETC) using CloudFormation .

Automation and scheduling of task using lambda function.

Setting up of monitoring environment by integrating Cloud Watch with monitoring solutions like Zabbix, Nutanix Beam.

EDUCATIONAL HISTORY

GRAPHIC ERA UNIVERSITY

Bachelors in Technology in Computer Science and Engineering | 2012 - 2016
